

Project Initialization and Planning Phase

Date	15 March 2024
Team ID	6ab2a5f7eb88f5d3d45a5044
Project Name	Courier Management System (CMS)
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A customer sending parcel.	Book a shipment and check its delivery status.	I cannot always get a timely, clear update about my parcel.	Shipment information and status updates may be recorded or communicated separately across the courier process.	Uncertain and concerned about when my parcel will arrive.
PS-2	A courier branch manager.	Monitor shipments, delivery agents, and branch performance.	It is difficult to view all operational information in one place.	Booking, assignment, delivery updates, and performance information need centralized records and reporting.	Overloaded and less confident about making timely decisions.
PS-3	A delivery agent.	Receive assigned deliveries and update shipment progress.	Keeping shipment statuses current can require repeated manual coordination.	Delivery assignments and updates are not always managed through one automated workflow.	Frustrated by avoidable delays and communication gaps.
