

Scalability & Future Plan

Date	29.09.2006
Team ID	6ab2a5f7eb88f5d3d45a5044
Project Name	Courier Management System
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Manual assignment of delivery agents & limited real-time tracking	Operational delays & poor customer	High
2	No SMS/GPS integration, only email notifications	Reduced customer engagement & tracking accuracy	Medium
3	Dependency on Salesforce limits & storage limits	Performance issues with large shipment data	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports limited branches/users (up to 100)	Implement Experience Cloud + auto-scaling for 1000+ users
2	Data Storage	Standard storage, basic reports	Use Big Objects & external AWS archiving for old shipments
3	Performance	Flows may delay for bulk shipments	Optimize Flows to Apex triggers & batch processing
4	Security	Basic profiles & permission sets	Add 2FA, encryption, field-level security & audit trails

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Mobile tracking app + SMS notifications	Q1 2026	Better customer experience & real-time updates
Phase 2	GPS integration & live agent tracking	Q2 2026	Accurate ETAs & route optimization
Phase 3	AI-based delivery optimization & demand forecasting	Q3 2026	Reduced delivery time & cost savings
Phase 4	Multi-language support & global branch expansion	Q4 2026	Wider user base & business growth
