

Solution Requirements

Date	29 September 2026
Team ID	6ab2a5f7eb88f5d3d45a5044
Project Name	Courier Management System
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Create a comprehensive list of requirements to define exactly what your solution will do and how well it will perform.

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should *do*).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should *be*).

Fill out the descriptions and necessary details for each category provided below.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Authentication	<i>The system should allow customers, admins and delivery staff to securely log in using valid credentials.</i>	<i>High</i>
2	Authorization levels	<i>The system should provide different access permissions for Customer, Admin and Delivery Staff based on their roles.</i>	<i>High</i>
3	External interfaces	<i>The system should support</i>	<i>Medium</i>

		<i>integration with notification services for sending booking and delivery status updates.</i>	
--	--	--	--

4	Transactions processing	<i>The system should allow customers to book courier services, store booking details and update courier delivery status.</i>	<i>High</i>
5	Reporting	<i>The system should generate reports related to courier bookings, delivery status and completed deliveries.</i>	<i>Medium</i>
6	Business rules, etc.	<i>The system should generate a unique tracking ID for every courier booking and update the status at each delivery stage.</i>	<i>High</i>
7	Compliance to laws or regulations	<i>The system should protect customer and courier information and restrict access to authorized users.</i>	<i>High</i>

8	Other	The system should provide courier tracking, booking confirmation and delivery notifications to customers.	Medium
---	-------	---	--------

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
------	--------------	-------------------------	-------------------------------------

1	Performance & Speed	The system should respond quickly to user requests such as login, booking and tracking.	Main pages should load within 3 seconds .
2	Scalability	The system should support an increasing number of customers, bookings and courier records.	Should support at least 1,000 active users .
3	Security & Data Privacy	Customer, booking and delivery information should be protected from unauthorized access.	Only authorized users can access protected data.
4	Reliability & Availability	The system should remain available and maintain accurate courier information.	System should maintain 99% availability .
5	Usability & Accessibility	The system should have a simple and user-friendly interface that is easy to navigate.	A new user should be able to complete courier booking without assistance.

6	Other	<i>The system should be easy to maintain and update when new features are required.</i>	<i>System modules should be organized so that changes can be made without affecting unrelated modules.</i>
