Project Name	courier management system
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	N/A
8	Dockerfile / Containerization config (if applicable)	N/A
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```

/courier-management-system/ (project-root)
/src - Source code files (Login, Booking, Tracking, Payment modules)

/controllers - Courier, User, Payment controllers
/models - User, Shipment, Delivery Agent models
/routes - API routes
/public - Frontend assets
/tests - Test files
/docs - Documentation
/config - Configuration files
README.md- Setup and run instructions
requirements.txt - Python dependencies / package.json for Node
env.example.Environment template
app.py - Main application file.
    
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://courier-management-system.onrender.com
Login Credentials (Demo)	Demo User: demo@cms.com / demo123 Admin: admin@cms.com / admin123
Platform / Hosting Provider Provider	Render, Vercel / Salesforce Platform
Repository Link	https://github.com/TeamID-6ab2a5f7/courier-management-system
Demo Video Link	https://drive.google.com/courier-mgmt-demo

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites:

Python 3.9+ / Node.js 16+, MongoDB / Salesforce Developer Org, Git, VS Code

Step 1: Clone repository: `git clone https://github.com/TeamID-6ab2a5f7/courier-management-system.git`

Step 2: Install dependencies: `pip install -r requirements.txt` OR `npm install`

Step 3: Configure environment: copy `.env.example` to `.env` and set `DB_URI`, `JWT_SECRET`, Salesforce credentials

Step 4: Run database migrations: `python manage.py migrate` OR `npx setup`

Step 5: Start application: `python app.py` OR `npm start` / `python manage.py runserver`

Step 6: Open browser at `http://localhost:8000` or `http://localhost:3000` and login with demo credentials.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Real-time tracking delay up to 5 sec under heavy load	Implemented caching, future optimize with WebSocket
2	Payment gateway sandbox only, no live UPI yet	Using test mode, live integration pending
3	Admin dashboard slow for >1000 records	Added pagination and indexes, optimized queries.
