Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/your-username/courier-management-system
Programming Language(s)	JavaScript (Node.js), HTML5, CSS3, SQL
Framework(s) Used	Express.js, Bootstrap

Key Features Implemented	• User registration & login authentication • User registration & login authentication • Courier booking form with pickup & delivery details • Real-time parcel tracking using Tracking ID • Admin dashboard to update shipping status • Automated SMS/Email notifications for status changes
Pending / Incomplete Features	• Online payment gateway integration (currently supporting Cash on Delivery) • Advanced analytics for monthly courier reports

Setup / Run Instructions

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes

3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The Courier Management System backend is structured cleanly using MVC principles. The API endpoints handle tracking updates efficiently with MySQL query optimizations, and client-side input validations ensure smooth form submissions without page reloads.
