| <b>Project Name</b>  | Courier Management System |
| <b>Maximum Marks</b> | 5 Marks                   |

### Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

| S.No | Feature Name                       | Feature Description                                                                        | Module / Component    | Status<br>(Done / In Progress / Pending) | Marks Contribution |
|------|------------------------------------|--------------------------------------------------------------------------------------------|-----------------------|------------------------------------------|--------------------|
| 1    | User Authentication & Registration | Secure login, registration, and role-based access for customers and admins.                | Authentication Module | <b>Done</b>                              | 0.75 Marks         |
| 2    | Online Courier Booking             | Allows users to enter sender/receiver details, parcel weight, and submission.              | Booking Module        | <b>Done</b>                              | 0.75 Marks         |
| 3    | Real-Time Package Tracking         | Search and track current shipping status using a unique Tracking ID.                       | Tracking Module       | <b>Done</b>                              | 0.75 Marks         |
| 4    | Admin Status Management            | Admins can view all shipments and update status (In-Transit, Out for Delivery, Delivered). | Admin Dashboard       | <b>Done</b>                              | 0.75 Marks         |
| 5    | SMS / Email Notifications          | Sends automated confirmation and status alert notifications to users.                      | Notification Module   | <b>Done</b>                              | 0.5 Marks          |
| 6    | Shipping Rate Calculator           |                                                                                            | Billing & Rate Module | <b>Done</b>                              | 0.5 Marks          |
| 7    | Payment Gateway Integration        | Automatically calculates delivery cost based on weight, distance, and priority.            | Payment Module        | <b>In Progress</b>                       | 0.5 Marks          |
| 8    | Customer Feedback & Ratings        | Supports online payments through Cards, UPI, and Cash on Delivery option.                  | Feedback Module       | <b>Pending</b>                           | 0.5 Marks          |

**Feature Summary:**

| Metric                     | Count / Value |
|----------------------------|---------------|
| Total Features Planned     | 8             |
| Total Features Implemented | 6             |
| Core / Must-Have Features  | 5             |

|                                    |   |
|------------------------------------|---|
| Additional / Nice-to-Have Features | 3 |
| Features Tested & Verified         | 6 |

**Feature Category Breakdown:**

| S.No | Category                  | Features in Category | Example Features                                                             |
|------|---------------------------|----------------------|------------------------------------------------------------------------------|
| 1    | User Interface (UI)       | 2                    | Responsive Booking Form, Interactive Live Tracking Page                      |
| 2    | Backend / Logic           | 2                    | Courier Shipping Cost Calculator Engine, Automated Delivery Route Assignment |
| 3    | Database / Storage        | 1                    | Customer Profiles & Parcel Shipment History Storage (MySQL)                  |
| 4    | API / Integration         | 2                    | Automated SMS/Email Alert Service (Nodemailer/Twilio), Payment Gateway API   |
| 5    | Security / Authentication | 1                    | Password Encryption (Bcrypt) & Role-Based Access Control (Admin/Customer)    |
